Year 2: We are explorers

Gorringe Park Primary School

Vocabulary

Scratch – coding software using blocks.

Debug – find errors in a code and fix it.

Program – a list of events on scratch that has a purpose.

Predict – make a sensible guess.

Sprite – characters on scratch you can apply code to.

E-safety

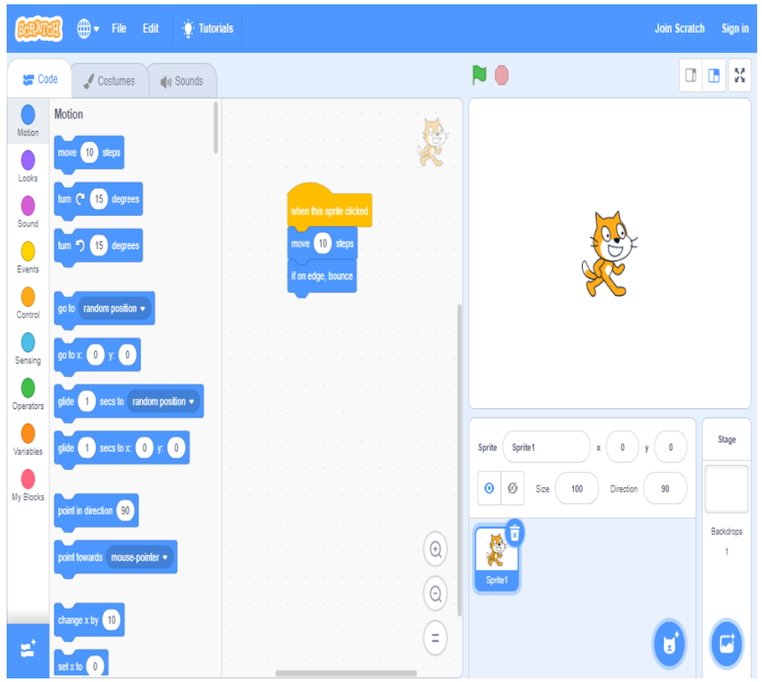
- When you are reviewing and looking at other people's projects, you need to think carefully about how you respond to them and what is kind on the internet.
- When using an online app like Scratch, you know to speak to an adult if you see something that makes you uncomfortable.

Key takeaways

- I can predict what a simple program will do using the blocks.
- I can create a simple movement program using movement blocks.
- I can give feedback on improvements on my peer's programs.
- I can create sprites and backdrops using the coding program.
- I can debug simple programs.

Key takeaways

Scratch is different to Scratch Jr. They both use blocks to create programmes. You can create more detailed programs with Scratch. What can you spot that is the same between Scratch and Scratch Jr?



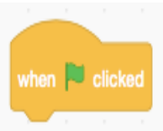
Knowledge check

What do all of these features do in Scratch?

Stops and starts the program.

Adds a sprite

Adds a background



Starts the program sequence

Tells the sprite to move.
