## Christian art

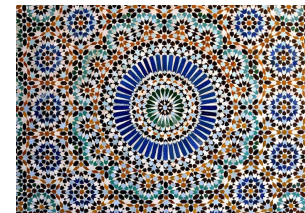

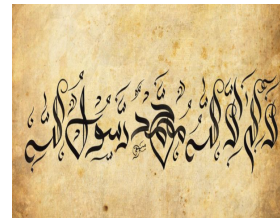

## Year 6 Faith and the arts

### Key Learning

Art forms can be used to express deep feelings and emotions.

Not all religions express themselves through the arts in the same way. Islamic art consists of calligraphy, vegetal patterns and geometric shapes. It is rare to find people or images in Islamic art. Some believe that it is completely forbidden to even make or draw these images so that people aren't tempted to worship anything other than God.

The Hindu story of Ramayana teaches Hindus that truth always prevails and that good always wins over evil.
